

# WG1

## STANDARDISATION, CERTIFICATION, LABELLING AND SUPPLY CHAIN MANAGEMENT

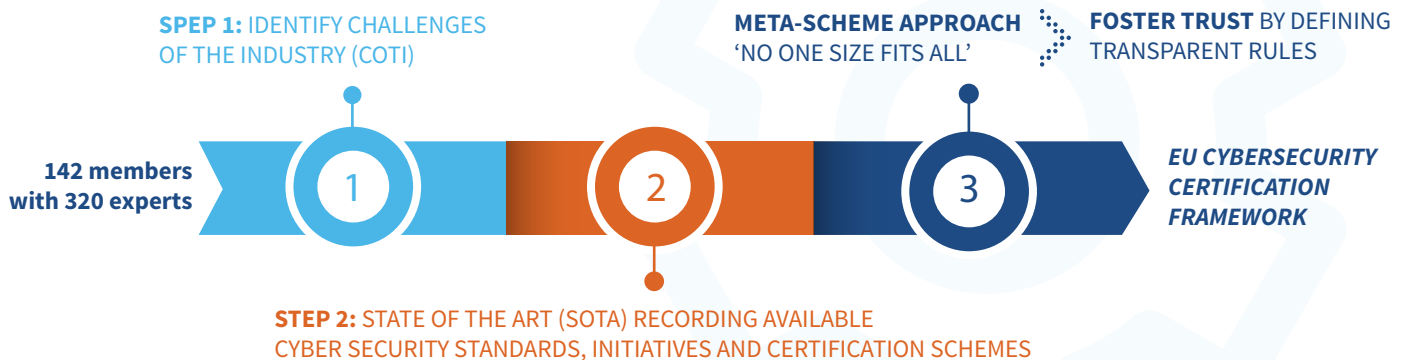

ECSCO supports activities for increased industrial competitiveness  
Contributes to activities for pre-standardisation and standardisation  
Supports the development and use of trusted European certified / labelled solutions across the supply chain and the various sectors

### MISSION & OBJECTIVES

ECSCO WG1 brings together certifiers, manufacturers, system integrators and service providers to:

- Understand the challenges of the industry in using standards and certification schemes
- Understand the needs of the market to identify the gaps in standardisation and propose a roadmap for priorities
- Define what harmonisation means towards a European cyber security certification framework
- Focus on the testing and validation of the supply / value chain in Europe

### WG1 HIGHLIGHTS

### SUPPORT TO THE EU CYBER SECURITY CERTIFICATION FRAMEWORK AND TRUSTED SUPPLY CHAIN IN EUROPE

- **SOTA, COTI reports update**
- **ECSCO Meta-scheme in practice** >> Tool for qualitative market analysis to define focused initiatives and promote EU solutions as methodology for the European Certification Framework (identification of the characteristics under which certification schemes can be viewed and selected)
  - *New version with general aspects of certification scheme composition, type of evaluations, continuous assessment and a mapping with the Cyber Security Act*
  - *Document on Assessment, from self to third-party, looking into the available types of assessment and identifying some of the criteria to decide on the fit-for-purpose type of assessment*
- **Analysis of security requirements, gaps in standardization and priorities for future EU certification schemes** >> Identify common priorities for definition of certification schemes

## SEGMENTATION

The working group is segmented into the following sub-working groups:

- SWG 1.1 “Self-assessment”
- SWG 1.2 “Third party assessment”
- SWG 1.3 “Base Layer”

## COLLABORATIONS

- Memorandum of Understanding with CEN/CENELEC and ETSI to define priorities for developing EU standards and simplify tasks for European Standard Organisations to initiate standardisation, in particular linked to certification
- Support to ENISA on the European Certification and JRC
