

Organize on Thursday October 14th 2021 the online webinar

The Italian Agency for National Cybersecurity (ACN)

GOALS

Information Technology engineers are seriously interested in activities carried on by the new Italian Agency for National Cybersecurity (Agenzia Cybersicurezza Nazionale - ACN), whose responsibilities will supplement those of other institutional players like AgID.

L'AGENZIA PER LA
CYBERSICUREZZA NAZIONALE

Speakers:

Ing. Angelo Tofalo
Engineer, Member of Parliament, former Undersecretary of Defense

Ing. Leonardo Querzoli
University "La Sapienza" Professor in the Department of Computer, Control and Management Engineering, coauthor of Italian National Framework for Cyber Security and Data Protection www.cybersecurityframework.it

Ing. Selene Giupponi
CEO Resecurity Europe, Founder of Women4Cyber - W4C - Italian chapter

Raoul "Nobody" Chiesa
ICT Security Senior Expert, Visionary Entrepreneur, Keynote Speaker, Cybersecurity Advisor and CyberGlobetrotter

Scientific Manager: **Ing. Alessandro Bonaccorso**
ICT Board President

REGISTRATION:

PARTECIPATION FEE

- Ordine Ingegneri Monza Brianza Engineers 10 €
- Others 15 €

(IVA esente art. 10 primo comma n. 20 del DPR 633/1972)

AGENDA

- 15.45 Start of live broadcasting**
- 15.55 Institutional Greetings and Opening**
Ing. Pierpaolo Cicchiello
President of Monza e Brianza Order of Engineers
- 16.00 Ing. Angelo Tofalo**
The Italian Agency for National Cybersecurity (ACN): past and present regulatory framework. The Agency and the need to spread a proper awareness on the subject..
- 16.40 Ing. Leonardo Querzoli**
Cybersecurity Assessment adopting the National Framework for Cyber Security and Data Protection.
The Framework is a governance tool for organizations of different types and sizes. Based on well-known NIST CSF, it was first published in Italy in 2015. Version 2.0 of the Framework was published in 2019 for including Data Protection needs defined in GDPR.
- 17.05 Show of: Hackmageddon video: back to Middle Age in one week**
- 17.15 Ing. Selene Giupponi**
→How enterprises should protect themselves from cyberattacks in 2021
Today, companies' data are already outside of perimeter therefore protecting the "enterprise perimeter" (Firewall, xIDS, IPS, DLP, etc...) is an obsolete approach, a technical focus.
→Live demo session
A query from a Cyber Threat Intelligence platform will be demonstrated looking for evidence.
- 18.15 Raoul "Nobody" Chiesa**
The future of CISOs: "from the finger to the Moon "
"Attacks are a technical problem. Defense is a political problem." Starting from this Mantra, the real current CISO issues will be analyzed. As the wise man said: "I'm pointing at the Moon, and you're looking at my finger"
- 18.45 Q&A and Conclusions**
- 19.00 End of webinar**
